

## InstaCoustic Launches New Acoustic Solutions Guide on CD

Acoustic insulation specialist InstaCoustic Ltd has launched a CD version of its ever popular Acoustic Solutions Guide.

The new version will be available from this month and is expected to make life a great deal easier for architects and specifiers looking for suitable acoustic solutions.

It contains up-to-date specifications and installation instructions for the company's entire range of acoustic wall, floor and ceiling products as well as its range of sports floors. It will make it even easier to identify the best solution to meet the requirements of the job, including the need to meet Robust Detail and Approved Document E requirements.

The paper version of the guide, launched in June 2008, immediately proved popular with industry professionals and won praise for its comprehensive, easy-to-use format. So much so, that many expressed a desire to be able to take it out on site.

The new CD version will make that possible. Just slip it in your pocket or briefcase and it is ready to use on any computer with a CD drive.

To order your copy now click here  
or call our sales office on 0118 973 9560

### Improved Access to CAD Drawings for All InstaCoustic Systems

Architects can now access downloadable CAD drawings for all InstaCoustic systems via the company's website. This will make it easier for architects and other industry professionals to define the exact construction requirements for each acoustic system they specify. Accurate construction details are essential as the effectiveness of acoustic solutions can depend upon how they are constructed.

The full range of CAD drawings is now available at [www.instacoustic.co.uk](http://www.instacoustic.co.uk) and can be downloaded after completing a quick and simple registration process. You only need to register once, then on subsequent visits, you can simply log-in with your own password.
